Preface to the 6th Edition	xxiii

Section I. ECLS: General Principles

1. The History and Development of Extracorporeal Support.....	1
The History and Development of Extracorporeal Support	1
Extracorporeal Support: Earliest Beginnings	1
Global Spread of ECMO	6
Perseverance: Experience and Growing Indications in ECMO.....	9
Technology and Clinical Indications for ECMO: the Future is Bright	13
References.....	14
2. Nomenclature	17
Introduction.....	17
Fundamental Nomenclature.....	18
Abbreviations for Cannulation Configuration	20
Peripheral Cannulation Configuration	21
Central Cannulation	22
Combination of Central and Peripheral Applications	26
Independent Circuits	26
Commentary	26
Conclusion	27
References.....	28
3. The Circuit.....	29
Introduction.....	29
Circuit Components and Composition.....	30
Blood Pumps – Physics, Design, and Impact on Performance	32
Pressure Generating Pumps (Centrifugal Pumps)	33
Circuit Composition.....	38
Circuit Monitoring	39
Summary	42
References.....	43
4. Cannulation	47
Introduction.....	47
Basic Principles.....	47
Section 1: Percutaneous VA ECMO Cannulation in Older Children and Adults ...	48
Section 2: Percutaneous VV ECMO Cannulation in Older Children and Adults ...	54
Bicaval Double-lumen, Single Cannula.....	55
Section 3: Pulmonary Artery Cannulation, Percutaneous RVAD	57
Section 4: Surgical Cannulation for VA (VV) ECMO in Older Children and Adults....	57
Right Axillary/Subclavian Artery	59

Ligation.....	60
Purse String	60
Chimney.....	60
Section 5: Transthoracic ECMO Cannulation in All Age Groups	61
Sternotomy for Cannulation Disaster	63
Section 6: Babies and Children.....	64
Potential Pitfalls.....	65
Ligation Technique	68
Section 7: Airless Connection Techniques	68
Section 8: Cannula Size Tables.....	69
References.....	71
5. The Physiology of Extracorporeal Life Support.....	73
Cardiopulmonary Physiology	73
Cardiopulmonary Pathophysiology	75
Cardiopulmonary Pathophysiology during ECLS	76
The ECLS Circuit.....	76
Modes of Vascular Access and Perfusion	80
CO ₂ Removal	93
ECLS Management when the Native Lung is Recovering.....	94
Summary.....	94
6. Adverse Effects of Extracorporeal Life Support.....	97
Pathophysiology of Blood/Biomaterial Surface Interaction	98
Initiation of ECLS: Coagulation Pathway Activation and Inflammatory Response	100
Other Adverse Effects of ECLS	103
References.....	108
7. Circuit Malfunction and Crisis Management.....	113
Introduction.....	113
Prevention	114
Training	115
Preparation	115
Specific Emergencies.....	115
Membrane Lung Dysfunction.....	120
Emergency Circuit Exchange	121
References.....	123

Section II. Neonatal Respiratory Failure

8. Initiating Extracorporeal Life Support for Neonatal Respiratory Failure	125
Introduction	125
Neonatal Respiratory Diseases Predisposing to ECLS	125
Common Primary Etiologies for Neonatal ECLS	126
Less Common Primary Etiologies for Neonatal ECLS	127
Indications and Contraindications for ECLS in Neonates with Respiratory Failure ..	128
ECLS Cannulation for Neonates with Respiratory Failure	132
References.....	134

9. Management of Neonatal Patients with Respiratory Failure	137
Respiratory.....	138
Cardiovascular	141
Fluids, Electrolytes and Nutrition.....	142
Hematologic.....	143
Infection	144
Neurologic System.....	145
ECLS Circuit Considerations in the Neonate	147
Nursing Management.....	150
Family Support	150
Summary	151
References.....	152
10. Weaning and Decannulation in Neonatal Respiratory Failure.....	157
Weaning	157
Trialing-Off	158
Leaving Cannulas in Place.....	160
Decannulation	160
Vascular Reconstruction.....	162
Conclusion	163
References.....	164
11. Congenital Comorbidities & Extracorporeal Life Support for Respiratory Failure. 165	
Congenital Diaphragmatic Hernia	165
Congenital Comorbidities and Neonatal ECLS.....	171
Conclusions.....	174
References.....	175
12. Complications, Followup, and Outcomes of Neonates with Respiratory Failure	177
Introduction.....	177
Early Survival Outcomes and Complications.....	177
Long-term Medical Outcomes in Children without CDH	182
Long-term Neurodevelopmental Outcomes.....	183
Outcomes Following ECLS in Congenital Diaphragmatic Hernia.....	185
Recommendations for Long-term Followup.....	187
Conclusions.....	189
References.....	190

Section III. Pediatric Respiratory Failure

13. Initiating Extracorporeal Life Support for Pediatric Respiratory Failure	195
Therapeutic Conditions that May Harm the Lung	195
Pre-ECLS Patient Management	196
Overview of ECLS for Respiratory Support	198
Respiratory ECLS in Complex Conditions	199
Prolonged Respiratory ECLS	199
References.....	200

14. Management of Children with Respiratory Failure 203
Introduction.....203
Predicting Outcomes.....203
Management of the ECLS Circuit203
Ventilatory Management 204
Cardiovascular Management206
Renal and Fluid Management207
Gastrointestinal and Nutrition Management 208
Nursing Management..... 208
Pharmacology 211
Neurological Management..... 211
Anticoagulation, Thrombosis, and Bleeding Management212
End of Life Planning.....213
Family Support213
Conclusion213
References 214

15. Weaning and Decannulation of Children with Respiratory Failure 219
Strategies to Expedite Withdrawal of ECLS..... 219
Weaning Support and Trialing..... 220
Technique for Decannulation of Patients on VV ECMO..... 221
Continuing Venous Access after Decannulation 221
Approaches to Inadvertent Decannulation222
References.....223

16. Complications, Followup, & Outcomes of Pediatric Pts. with Respiratory Failure .. 225
History225
Outcomes225
Comorbid Conditions.....227
ECLS Complications and Mortality 229
Followup232
References 234

Section IV. Neonatal and Pediatric Cardiac Failure

17. Initiating Extracorporeal Life Support for Cardiac Failure in Children.....237
Introduction.....237
General Indications & Contraindications for ECLS Support with Heart Disease .. 238
Congenital Heart Disease 239
Extracorporeal Cardiopulmonary Resuscitation (ECPR) 241
Single Ventricle Congenital Heart Disease241
Myocarditis and MIS-C242
Procedural Support243
Intractable Arrhythmias 243
Pulmonary Hypertension243
ECLS as a Bridge to Heart Transplantation.....243
References..... 244

18. Management of Children with Cardiac Failure	247
Introduction.....	247
Utilization of Cardiovascular ECLS	247
Management of Common Issues for the Cardiac ECLS Patient	248
Single Ventricle Physiology	249
Residual Cardiac Lesions.....	251
Cardiovascular Assessment and Monitoring	252
Ventilator Management	253
Inotrope/Vasoactive Medications.....	254
Other Organ System Considerations Specific to the Cardiac ECLS Patient	255
Summary	257
References.....	258
19. Weaning and Decannulation of Children with Cardiac Failure	261
Introduction.....	261
Timing of Weaning of ECLS.....	261
Myocardial Injury and Recovery	261
Special Considerations	262
Predictors of Successful Weaning	263
Weaning and Trialing-off ECLS.....	264
Trial-off strategies	264
Rate of Weaning.....	265
Preparing and Optimizing for Decannulation	265
ECLS Decannulation	266
Surgical Aspects of Decannulation	266
Failure to Wean	268
Risk Factors for Mortality.....	269
Conclusion	269
References	270
20. Bridging Children with Cardiac Failure	273
Introduction.....	273
Bridge to Recovery	274
Bridge to Decision	277
Bridge to Bridge and Bridge to Transplantation.....	277
Care of the ECLS Patient on the Transplant Waitlist	279
Conclusion	280
References.....	281
21. Extracorporeal Cardiopulmonary Resuscitation in Children	283
Introduction.....	283
Definition of ECPR.....	284
Objectives of ECPR	284
Epidemiology, Utilization, and Outcomes	284
Patient Selection	285
Equipment.....	286
System and Team	286
Resuscitation Measures	287

Cannulation	289
ECPR Protocols	290
Quality Measures	290
Early ECLS Postcardiac Arrest Care (E-PCAC)	290
ECLS Blood Flow, Gas Exchange, Temperature, and Blood Pressure.....	291
Other Pharmacological Cointerventions and Aseptic Technique.....	292
Anticipating End-of-Life Care in the ECPR Patient and Their Family	292
Duration of CPR and Time to ECLS Flow	292
Resources	293
Ethics and Informed Consent.....	293
Summary	293
References.....	295
22. Complications, Followup, and Outcomes of Children with Cardiac Failure	299
Introduction	299
Common Complications During ECLS	299
Early Survival Outcomes.....	301
Risk Factors for Early Morbidity and Mortality	302
Specific Populations.....	302
Long-Term Survival	303
Long-Term Neurodevelopmental Outcomes.....	304
Post ECMO Quality of Life (QoL)	304
Followup	305
Conclusions.....	305
References.....	309

Section V. Adult Respiratory Failure

23. Initiating Extracorporeal Life Support for Adult Respiratory Failure	315
Introduction.....	315
Rationale for ECLS in Respiratory Failure.....	315
Modes of Support for Respiratory Failure.....	315
Clinical Conditions Considered for ECLS in Respiratory Failure	316
Initiating ECMO for Refractory Hypoxemia.....	317
Contraindications to ECLS for Respiratory Failure	319
Summary	319
24. Management of Adult Patients with Respiratory Failure	323
General Principles.....	323
Physiologic Optimization	323
Respiratory Support and Ventilator Management.....	323
Sedation and Analgesia.....	326
Hemodynamic Monitoring and Management	326
Fluid Status and Renal Support	327
Infection Diagnosis and Treatment.....	327
Hematologic Monitoring and Management.....	328
Nutrition.....	330

Physical Therapy.....	330
Integument and Eye Care.....	330
Psychosocial Support.....	330
References.....	332
25. Weaning and Decannulation in Adult Respiratory Failure	335
Introduction.....	335
Appropriateness for Liberation Trials and Indicators of Recovery.....	335
Weaning.....	336
Decannulation	338
Immediate Post-ECLS Management	340
Conclusion	341
References.....	342
26. Complications, Followup, and Outcomes of Adults with Respiratory Failure	345
Complications of VV ECMO.....	346
Followup and Long-term Outcomes after ECLS.....	350
References.....	351

Section VI. Adult Cardiac Failure

27. Initiating Extracorporeal Life Support for Adult Cardiac Failure.....	355
Introduction.....	355
Acute Coronary Syndrome	356
Acute Decompensated Chronic Heart Failure	358
Isolated Right Ventricular Failure.....	359
ECLS in Cardiac Surgery.....	360
Interventional and Transcatheter Procedures	362
Myocarditis, Infection, and Non-Infection-Related Indications	363
Cardiogenic Shock from Other Nonsurgical Etiologies	364
Pregnancy, Trauma, Sepsis, Poisoning, and Malignancy	364
Conclusions.....	365
References.....	366
28. Management of Adult Patients with Cardiac Failure.....	371
Patient and Circuit Monitoring	371
Cardiovascular Management	374
Mechanical Ventilation Management	375
Analgo-sedation, Neurologic Monitoring, Physical Therapy and Mobility.....	378
Eyes, Ears, Nose and Throat Care	379
Nutrition and Gastrointestinal Dysmotility.....	379
Renal Management	380
Hematological and Coagulation Management	380
Nosocomial Infection	382
Skin and Cannula Site Management.....	382
Special Considerations for Acute Coronary Ischemia Post PCI ECLS	383
Special Considerations for Postcardiotomy ECLS	384
Special Considerations for Acute Massive Pulmonary Embolus.....	384

References.....	386
29. Weaning and Decannulation in Adult Cardiac Failure	393
Introduction	393
Pathophysiology of Weaning VA ECMO	393
Tools to Assess Cardiac Recovery	393
Prerequisites for VA ECMO Weaning	394
Weaning Techniques.....	395
Predictors of Successful ECMO Wean	397
Weaning in Special Situations	397
Adjuncts to VA ECMO Weaning.....	398
Proposed Weaning Strategy	400
Failure to Wean from VA ECMO	400
Decannulation	401
Conclusions.....	402
References.....	403
30. Bridging Adult Patients with Cardiac Failure	407
Introduction.....	407
ECLS in Preparation for Cardiac Surgery	407
Bridge to Recovery	409
Bridge to Decision	409
Bridging to Transplantation or Durable Mechanical Support	410
ICU Care of Candidates Bridging to MCS or Transplant.....	411
Conclusion	413
References.....	415
31. Extracorporeal Life Support for Adult Congenital Heart Disease.....	419
Introduction.....	419
Scores and Tools for Evaluating Need for and Risk of ECLS in ACHD	419
Evidence-Based Medicine and Randomized Trials Related to ECLS	425
Respiratory ECMO for ACHD	426
Cardiac ECMO for ACHD.....	427
ECLS & VAD as a Bridge to Heart, Lung, or Heart and Lung TXP.....	428
ECLS & VAD as a Bridge to Combined Heart-Liver & Heart-Liver-Kidney TXP ...	429
The Future of ECLS in ACHD.....	431
Summary	431
References.....	432
32. Extracorporeal Cardiopulmonary Resuscitation in Adult Patients.....	437
Evidence for ECPR.....	437
Patient Selection	438
Timing of ECPR Initiation	438
Outcomes in ECPR	439
Practicalities and Techniques.....	440
Immediate Steps Post-initiation of VA ECMO	442
Post-resuscitation Care	442
Ongoing Management	443
Additional Organizational Considerations.....	443

Conclusion	443
References.....	446
33. Complications, Followup, and Outcomes of Adults with Cardiac Failure	449
Introduction.....	449
Complications of VA ECMO for Cardiac Failure.....	449
Outcomes in Adult Cardiac ECMO Patients	453
Conclusions.....	454
References.....	456

Section VII. Special Indications

34. Pregnancy	459
Introduction	459
Physiological Changes During Pregnancy	459
Etiology of Severe Cardiopulmonary Failure during Pregnancy.....	460
ECLS Considerations during Pregnancy	460
Fetal Monitoring and Management.....	462
Pregnancy Complications	465
ECLS Complications	466
Outcomes	466
References.....	467
35. Trauma and Environmental Injury.....	471
Introduction.....	471
Patient Selection	471
Burns and Inhalation Injury	472
Cardiogenic Shock and Cardiac Arrest in Trauma	474
Bleeding and Hemorrhagic Shock	474
Special Considerations.....	474
Pediatric Patients	475
Special Considerations in Environmental Injury	475
Contraindications.....	476
Anticoagulation	476
Surgery During ECLS	476
Complications	477
Outcomes and Survival	477
Conclusion	477
References.....	478
36. Septic Shock.....	481
Introduction.....	481
Indications.....	482
Contraindications.....	482
Cannulation strategies.....	483
Management during ECMO.....	485
Outcomes	487
Conclusions.....	487

References.....	488
37. Poisoning.....	491
Introduction.....	491
Epidemiology.....	491
General Approach to the Poisoned Patient	492
First Line Treatment	493
Rationale for VA and VV ECMO in Poisoning	494
Animal Studies.....	494
Human Studies.....	494
Ethical Considerations	497
Technical Considerations and Potential Contraindications of ECLS in Poisoning..	497
Conclusion	498
References.....	499
38. Elderly Patients.....	503
Introduction.....	503
Epidemiology and Trends in the Use of ECLS in the Elderly	503
Circulatory Support	504
Postcardiotomy and Non-postcardiotomy Shock	505
Respiratory Support.....	506
Predicting Outcomes in the Elderly.....	507
Complications and Discontinuation of Therapy	508
Conclusions.....	509
References.....	510
39. Malignancy and Immunodeficiency	513
Introduction.....	513
Support in Pediatric and Adult Patients with Solid Organ & Blood Cancer	513
Patients with Massive Mediastinal Masses.....	515
Patients Undergoing HSCT.....	516
Adult Patients with HIV.....	518
Autoimmune Disease	518
References.....	520
40. Lung Transplantation	525
ECLS as Bridge to Lung Transplantation.....	525
Intraoperative Mechanical Support.....	527
ECMO for Patient Support after Lung Transplantation	529
Conclusion	530
41. Heart Transplantation	533
Context Outcomes of Heart Transplantation in Adults and Children	533
The Transplant Operation.....	534
Assessment of Cardiac Function.....	534
Threshold for ECLS in Primary Graft Failure	535
Aims of Support	535
Left Heart Decompression.....	535
Coagulation Management.....	536
Assessing Recovery	536

Immunosuppression	536
Outcome.....	536
Failure to Recover Donor Heart.....	536
ECLS for Late Graft Failure after Heart Transplantation	536
Conclusion	537
References.....	538

Section VIII. Adjunct Extracorporeal Support

42. Extracorporeal Elimination	541
Introduction	541
Kidney Replacement Therapy During ECLS	541
Therapeutic Plasma Exchange During ECLS	544
Therapeutic Cytopheresis	546
Hemoadsorption Therapies	546
Extracorporeal Liver Support	547
Conclusion	548
References.....	549
43. Extracorporeal Carbon Dioxide Removal	553
Introduction.....	553
ECCO ₂ R Compared to ECMO.....	553
Current ECCO ₂ R Strategies.....	554
Clinical Considerations for ECCO ₂ R.....	555
Initiating and Managing ECCO ₂ R	557
Conclusions.....	559
References.....	560
44. Other Mechanical Circulatory Support.....	565
Introduction.....	565
Impella	565
Combining Impella and ECMO (ECpella)	567
Combining IABP and VA ECMO	569
Escalation and De-escalation of MCS	569
Escalation.....	569
Possible Uni- or Biventricular Escalation.....	570
De-escalation	572
Total Artificial Heart	572
TandemHeart.....	572
Specific Pediatric Considerations	572
Outcomes	575
References.....	576
45. Extracorporeal Therapy to Facilitate Organ Donation.....	579
Introduction.....	579
Understanding Deceased Organ Donation.....	580
Donation after Brain Death (DBD).....	580
Donation after Circulatory Death (DCD)	581

Donation of Abdominal Organs from DCD.....582
Donation of Cardiac Grafts from cDCD..... 584
Ethical and Legal Considerations in NRP DCD Donation587
ECMO-assisted DBD Organ Donation.....587
When Patients on ECMO Become Donors 588
References..... 589

Section IX. Supportive Care

46. Transport 593
 History593
 Outcomes of Transport593
 Transport System Models of Care..... 594
 Transport Team Composition 594
 Indications and Contraindications for Mobile Transport.....595
 Mobile Transport Equipment.....596
 Team Training597
 Transport Considerations 599
 Special Physiologic Concerns during Transport.....601
 Mobile ECLS Complications.....602
 Special Circumstances603
 References..... 604
47. Physiotherapy and Mobilization.....607
 Introduction.....607
 Awake ECLS 608
 Barriers to Early Mobilization 609
 Initiation of Early Rehabilitation and Mobility 609
 Complications during Mobilization612
 Multidisciplinary Team Approach613
 Outcome Measures to Objectively Document Rehabilitation Progress & Potential ..615
 Prone Positioning.....615
48. Bedside Ultrasound 623
 Pre-ECLS623
 ECLS Procedural Guidance623
 Monitoring on ECLS625
 Weaning.....627
 Post-ECLS Care.....627
 Specific Neonatal and Pediatric Considerations627
 Conclusion 628
 References..... 639
49. Pharmacology 643
 Introduction.....643
 Pharmacokinetics and Pharmacodynamics in ECLS.....643
 Practical Guidance for Medication Dosing in ECLS.....646
 Antimicrobial Therapy 648

Sedation and Analgesia.....	648
Other Medications	651
Conclusion	651
References.....	652
50. Anesthesia	655
Introduction.....	655
Anesthetic Pharmacology and Physiology.....	655
Developing and Implementing an Anesthesia Plan	659
Conclusion	663
References.....	664
51. Procedures During Extracorporeal Life Support	667
Introduction.....	667
Decision Threshold – Three Questions.....	667
General Principals.....	668
General Measures	668
ECLS Circuit Related Procedures.....	669
Diagnostic Procedures	670
General Surgical Procedures	671
Trauma and Burn Patients.....	672
Specific Surgical Procedures in Respiratory ECMO	674
ECLS for Procedural Support in Thoracic Surgery	675
Specific Surgical Procedures in Cardiac ECMO	676
Conclusion	677
References.....	678

Section X. Organization

52. Starting a New Program.....	685
Introduction.....	685
Phases to start a new ECLS program:.....	685
Phase 1: Initiation phase	685
Phase 2: Planning Phase	687
Phase 3: Execution Phase	689
Phase 4: Auditing Phase.....	690
Phase 5: Development Phase	690
New ECLS Centers in Special Situations.....	692
Conclusion	692
References.....	693
53. Centralization and Regionalization.....	695
Introduction	695
Case Volume and Outcome	695
Regionalization	697
Practical Experience with Regionalization.....	698
Barriers	698
Challenges in Regionalization	698

Integrated Model.....	699
Central Coordination	700
Conclusions.....	702
References.....	703
54. Education and Training.....	707
Educational Process	707
Establishing ECLS Competency.....	708
Development of Core ECLS Curriculum.....	710
Maintaining Competency Standards-Assessing Competency of ECLS Practitioners	715
Feedback	718
Summary	718
References.....	719
55. Quality.....	721
Introduction.....	721
Commitment to Quality and Safety	722
Data Collection and Measuring Quality	722
Performance Measurement	722
Quality Improvement Processes for ECLS Using the Model for Improvement...	724
Simulation as Quality Improvement Tool for ECMO.....	726
Variability in Quality Processes	727
Innovation and New Technologies.....	727
References.....	729
56. Economics	731
Introduction.....	731
Fundamental Considerations.....	731
Costs	732
Outcomes	733
The Quality Adjusted Life Year (QALY).....	733
Assessing the Value of ECLS.....	734
Assessing the Cost Effectiveness of ECLS	736
Funding ECLS in Emerging Economies.....	737
Conclusions.....	738
References.....	739
57. Ethics.....	741
Introduction.....	741
Challenges with Patient Selection	741
Challenges with Withdrawal of ECLS Support	744
Challenges Specific to ECLS in Children.....	746
Challenges with Determining and Declaring Death	747
Conclusions.....	747
References.....	749
58. Research.....	753
The Need for Collaboration	753
The Importance of Infrastructure–Device-Specific Registries.....	755
Innovative Clinical Trial Designs	756

The Future	757
References.....	758
59. Emerging Infectious Diseases	759
Introduction.....	759
Preparedness	759
Assessment	760
Coordination	760
Conclusions.....	761
References.....	762
60. The ELSO Registry	763
Knowledge Attainment	763
Enhancing Center-based Efforts to Improve Quality	764
Supporting Development of Devices used in ECLS.....	766
Advancing the Reliability and Utility of Registry Data.....	767
International Engagement of Diverse Membership	768
Future Steps	768
References.....	769
Glossary	771
Appendix	773
Index.....	775
